# Datto's State of the Channel **Ransomware Report**

Follow us on Twitter: @Datto

Visit our Blog: [www.datto.com/blog](http://www.datto.com/blog)

The background of the entire page is a repeating pattern of green skulls and bones. The skulls are stylized with two circular eyes and a simple jawline. The bones are scattered around the skulls, creating a dense, textured effect. The pattern is consistent across the entire background, including the area around the central text box.

## ABOUT THIS REPORT

With survey findings gathered from 1,700+ Managed Service Providers (MSPs) serving 100,000+ small-to-mid-sized businesses (SMBs) around the globe, Datto's State of the Channel Ransomware Report provides unique visibility into the state of ransomware from the perspective of the IT Channel and their SMB clients who are dealing with these infections on a daily basis. The report provides a wealth of detail on ransomware, including year-over-year trends, frequency, targets, impact, and recommendations for ensuring recovery and continuity in the face of the growing threat.

This report covers the evolution of ransomware from Q2 2016 to Q2 2017.

To learn more about this report, please reach out to [Katie Thornton](#), Senior Manager of Content Marketing at Datto, Inc.

# KEY FINDINGS

- **Global ransomware attacks against small-to-mid-sized businesses (SMBs) soar.** An estimated 5 percent of global SMBs fell victim to a ransomware attack from Q2 2016–Q2 2017. According to 97 percent of managed service providers (MSPs), ransomware attacks are more frequent in 2017. Eighty-six percent cite SMB clients recently victimized by ransomware, 21 percent report six or more SMB attacks in the first half of 2017 alone.
- **Ransomware attacks will continue to thrive over the next two years.** According to 99 percent of MSPs, the frequency of SMB targeted attacks will continue to increase over the next two years.
- **More SMBs are reporting attacks to the authorities and less are paying the ransom.** Less than one in three ransomware attacks are reported by SMB victims to the authorities, a marked improvement from one in four incidents reported in 2016. Additionally, 35 percent report SMBs paid the ransom, down from 41% in 2016. The total cost of ransom paid to ransomware hackers in 2017 is \$301M. Of those victims that pay up, 15 percent still never recover the data.
- **The ransom isn't what breaks the bank. The downtime and data loss cut the deepest.** As a result of a ransomware attack, 75% of MSPs report clients experienced business-threatening downtime.
- **Today's ransomware hackers are ruthless and greedy.** Nearly 30 percent of MSPs report a ransomware virus remained on an SMB's system after the first attack and struck again at a later time. One in three MSPs report ransomware encrypted an SMB's backup, making recovery even more complex.
- **CryptoLocker is still the most common variant attacking SMBs, but new and aggressive strains pop up every single day.** Nearly 85 percent of MSPs who've dealt with ransomware report seeing CryptoLocker. Additional common variants include CryptoWall, Locky and WannaCry, which is a new addition to the list.
- **No industry, operating system, cloud or device is safe from these attacks.** Among those industry verticals who are targeted most by ransomware attacks are Construction, Manufacturing and Professional Services. SaaS applications continue to be a growing target for ransomware attacks with Dropbox, Office 365 and G Suite most at risk. Mobile and tablet attacks are also on the rise.
- **When it comes to ransomware awareness, the majority are still in the dark.** While 90 percent of MSP respondents cited they are "highly concerned" about the business threat of ransomware, only 38 percent of SMB clients felt the same. This could be due to the lack of mandatory cybersecurity training across SMBs, which MSPs cite as the leading cause of ransomware infections.
- **Ransomware outsmarts today's top security solutions, so backup is essential.** MSPs are reporting successful infections despite SMBs having Anti-Virus Software, Email/Spam Filters, Ad Blockers, and regularly updated applications. The #1 most effective means for business protection from ransomware is a backup and disaster recovery (BDR) solution followed by cybersecurity training.
- **With a reliable backup and disaster recovery solution in place, the majority of SMBs will fully recover from a ransomware infection.** With a reliable backup and recovery solution (BDR) in place, 96% of MSPs report clients fully recover from ransomware attacks.

# THE #1 CYBERSECURITY THREAT FOR BUSINESSES TODAY: RANSOMWARE

ACROSS THE GLOBE, AN ESTIMATED  
**5% OF SMALL-TO-MID-SIZED BUSINESSES (SMBs)**  
**FELL VICTIM TO RANSOMWARE** FROM 2016-2017

## GLOBAL RANSOMWARE ATTACKS ARE ON THE RISE

2017

**97%** REPORT THAT RANSOMWARE IS BECOMING MORE AND MORE FREQUENT.

**99%**

PREDICT THE FREQUENCY OF ATTACKS WILL CONTINUE TO INCREASE OVER THE NEXT 2 YEARS.

FOR SMBs, IT'S NO LONGER A QUESTION OF IF, BUT WHEN

**6 IN 7** REPORT SMBs  
VICTIMIZED BY RANSOMWARE  
FROM 2015-2017.

**6 IN 10** REPORT ATTACKS IN  
THE 1ST HALF OF 2017 ALONE.

**GEO TREND:** In APAC, 93% of MSPs  
report attacks from 2015-2017 and  
75% report attacks in H1 2017.

# RANSOMWARE IS A FULL-BLOWN EPIDEMIC FOR GLOBAL SMBs

**Q:** How many clients have experienced a recent ransomware attack?

report recent attacks of 1-5 SMBs

NO 74%

YES  
26%

An unlucky **26%** report **multiple attacks** against SMBs in a single day.

**GEO TREND:** In Canada, 31% of MSPs report multiple ransomware incidents in a single day.

**MORE RANSOMWARE ATTACKS REPORTED  
TO AUTHORITIES BY SMBs**

**LESS THAN 1 IN 3  
ATTACKS ARE REPORTED  
TO THE AUTHORITIES,**

A MARKED IMPROVEMENT FROM 1 IN 4 ATTACKS  
REPORTED IN 2016.

## LESS SMBs ARE PAYING CYBER CRIMINALS THE RANSOM

IN 2017,

**35% REPORT  
SMBs PAID THE RANSOM,**

WHICH IS SIGNIFICANTLY LESS THAN IN 2016.

2016:

**41%**

2017:

**35%**

OF THOSE THAT PAID THE RANSOM,

**15% NEVER  
RECOVERED THE DATA.**

**GEO TREND:** In the UK alone,  
21% of SMBs who paid the ransom  
never recovered the data.

## FOR SMBs, THE RANSOM ISN'T WHAT BREAKS THE BANK

**Q:** If ransom was requested, how much (on average)?

**TOTAL RANSOM PAID BY SMBs  
TO RANSOMWARE HACKERS\*:  
\$301 MILLION.**

\*Between Q2 2016 and Q2 2017

## THE DOWNTIME CUTS THE DEEPEST

**Q:** Which of the following have clients experienced due to a ransomware attack?

**TODAY'S CYBER CRIMINALS ARE MORE RUTHLESS THAN EVER**

**29%** of MSPs  
REPORT

**RANSOMWARE VIRUS REMAINED  
ON AN SMB'S SYSTEM AFTER THE  
FIRST ATTACK AND STRUCK AGAIN  
AT A LATER TIME.**

**33%** of MSPs  
REPORT

**RANSOMWARE ENCRYPTED  
AN SMB'S BACKUP.**

**GEO TREND: IN APAC,**  
42% report ransomware  
encrypted SMB backups.

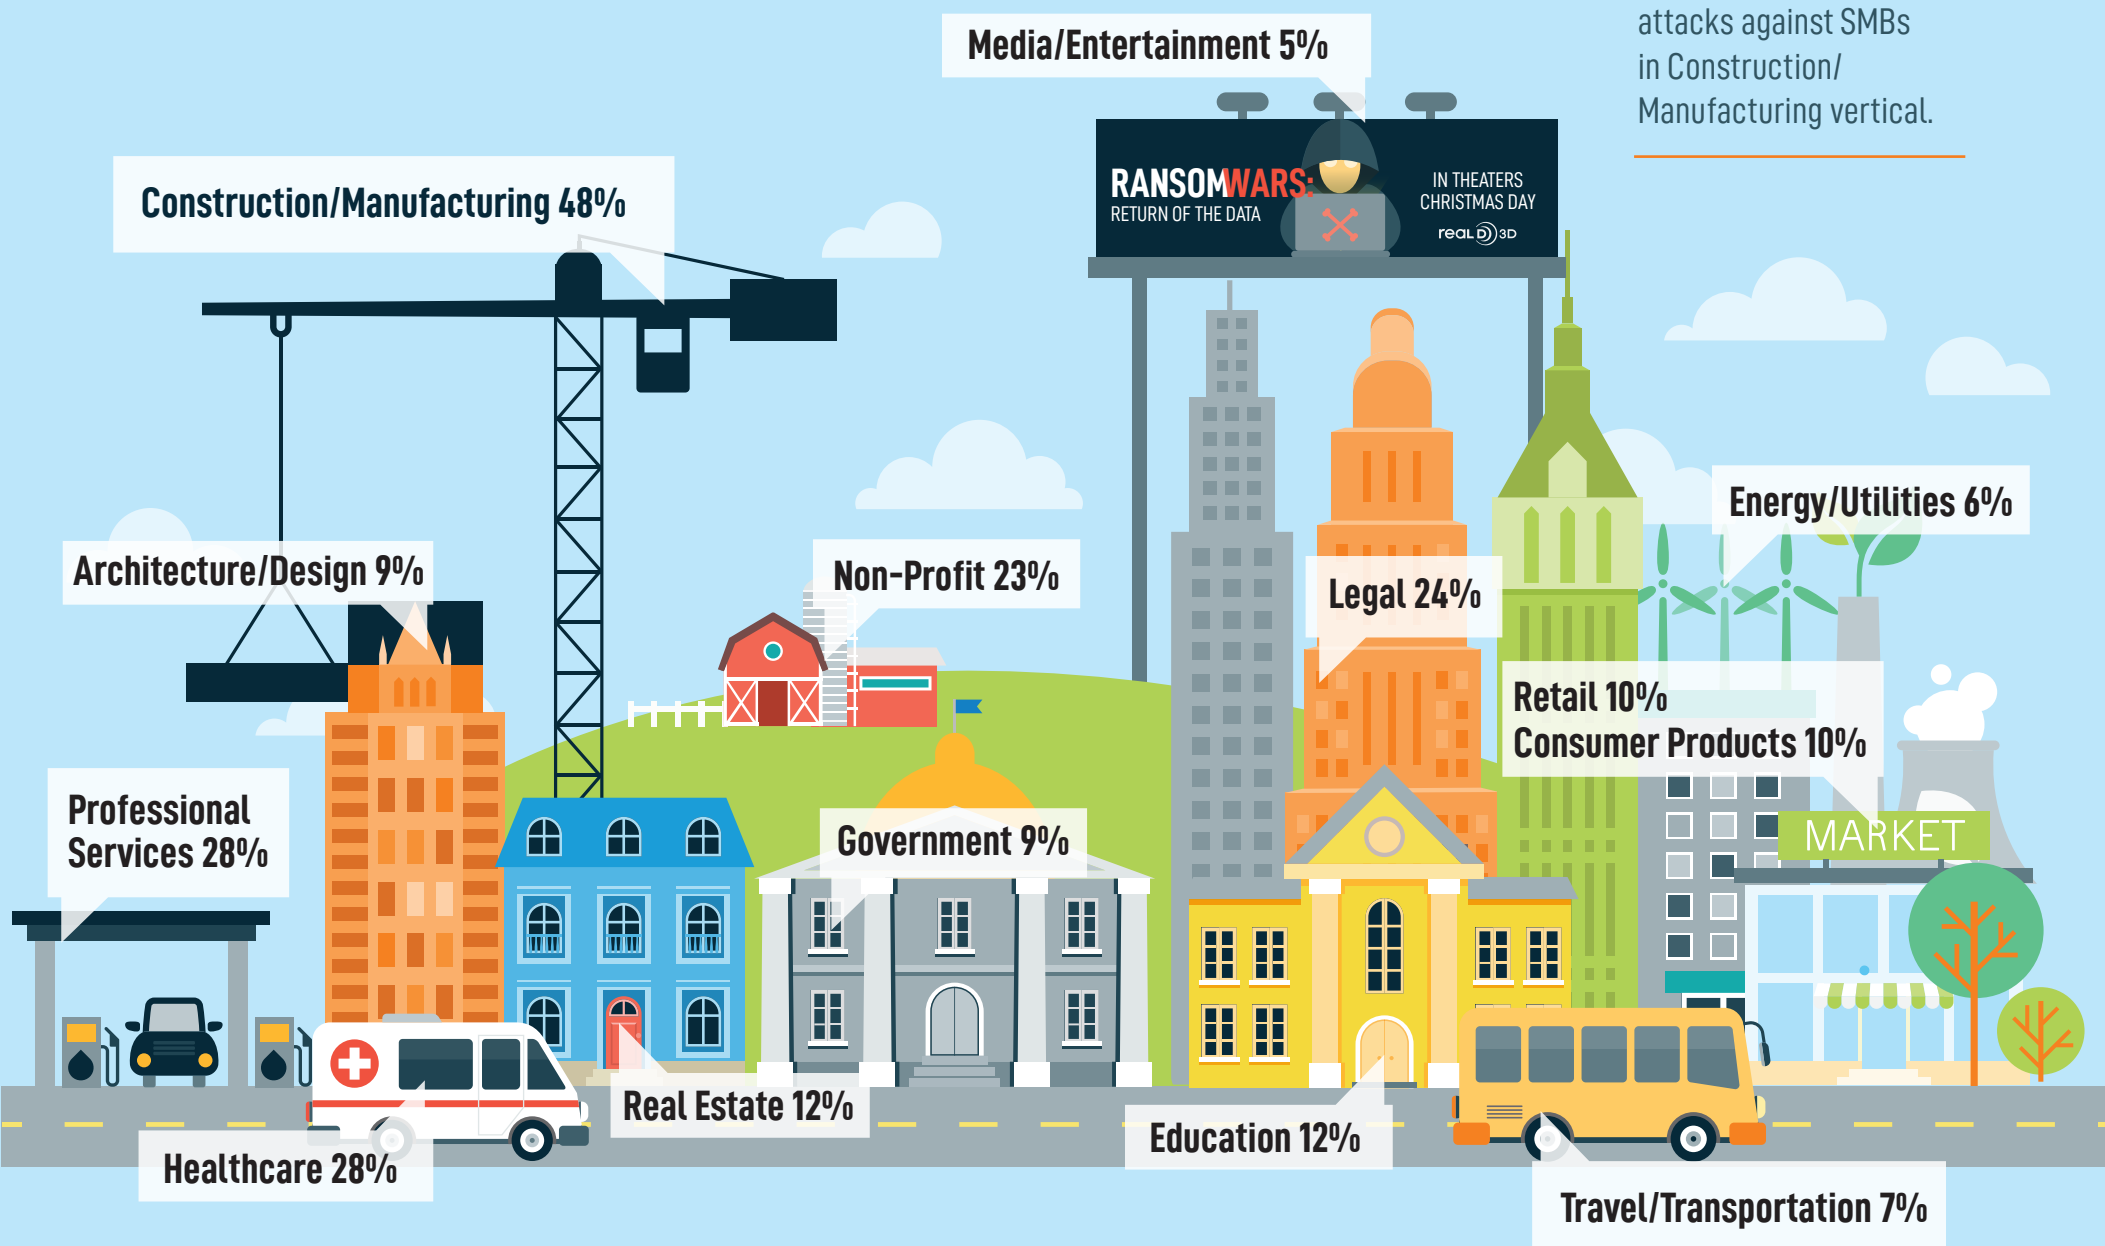

## CRYPTOLOCKER STILL KING, BUT AGGRESSIVE STRAINS LAUNCH EVERY SINGLE DAY

**Q: Have any of your client's been victimized by any of the following?\*** (Check all that apply)

# CONSTRUCTION/MANUFACTURING ARE HIGHLY TARGETED, BUT NO INDUSTRY IS SAFE

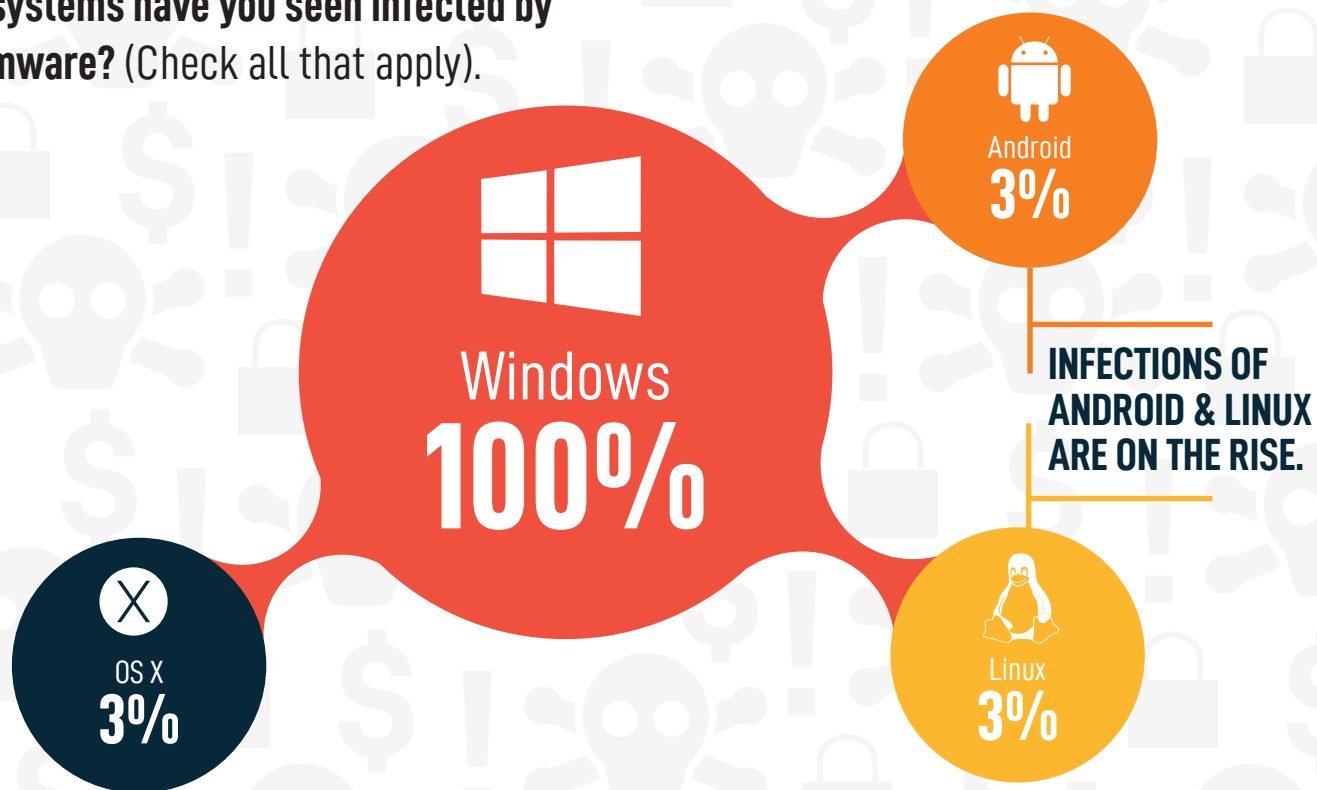

**GEO TREND:** In APAC,  
62% report ransomware  
attacks against SMBs  
in Construction/  
Manufacturing vertical.

## ALL OPERATING SYSTEMS ARE AT RISK TO RANSOMWARE

**100% OF MSPs REPORT WINDOWS RANSOMWARE INFECTIONS, BUT NO SINGLE OS IS SAFE.**

**Q: What systems have you seen infected by ransomware?** (Check all that apply).

**GEO TREND:** In EMEA, 7% of MSPs report Android ransomware infections.

## MOBILE/TABLET RANSOMWARE ATTACKS ARE ON THE RISE

# SAAS APPLICATIONS ARE NOT IMMUNE TO RANSOMWARE

Of MSPs who report ransomware in SaaS-based applications, the most common are:

**GEO TREND:** In APAC, 42% of MSPs report ransomware infections in cloud-based applications.

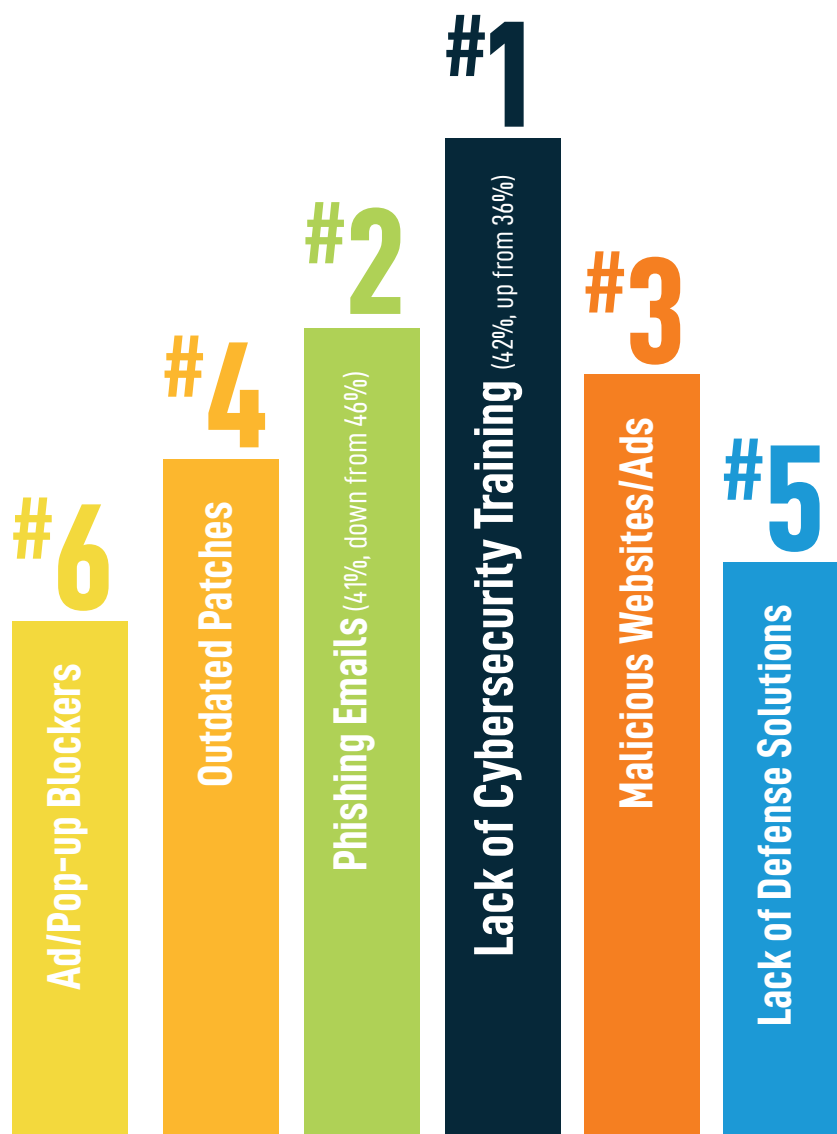

## MAJORITY OF SMBs ARE IN THE DARK ABOUT RANSOMWARE THREAT

Who's "HIGHLY CONCERNED" about ransomware?

IN 2017, **90% OF MSPs ARE "HIGHLY CONCERNED" ABOUT THE RANSOMWARE THREAT** WHILE ONLY 38% OF SMBs FEEL THE SAME.

# LACK OF CYBERSECURITY TRAINING FUELS THE SUCCESS OF RANSOMWARE

**Q:** What would you say is the leading of a ransomware infection?

The majority of MSPs blame the **lack of cybersecurity training across SMBs**. Employees today are largely unprepared to defend themselves against these attacks.

# TODAY'S TOP CYBERSECURITY SOLUTIONS ARE NO MATCH FOR RANSOMWARE

**Q: Of the ransomware incidents you've encountered, had they implemented any of the following?**  
(Check all that apply)

AS NO SINGLE SOLUTION IS GUARANTEED TO PREVENT RANSOMWARE ATTACKS, **A MULTILAYERED PORTFOLIO IS HIGHLY RECOMMENDED.**

## BACKUP & DISASTER RECOVERY (BDR) MOST EFFECTIVE RANSOMWARE PROTECTION

**Q:** Of the following, which is most effective in terms of business protection from ransomware?

**The #1 solution for SMB ransomware protection?**

**Backup & Disaster Recovery** followed by cybersecurity training for all employees.

## WITH RELIABLE BDR, MAJORITY OF SMBs WILL RECOVER FROM RANSOMWARE

**WITH** BDR in place,  
**96% REPORT SMBs  
FULLY RECOVER  
FROM RANSOMWARE**

**WITHOUT** BDR in place,  
**40% REPORT SMBs  
UNABLE TO RECOVER  
QUICKLY AND FULLY  
FROM RANSOMWARE**

**95% OF MSPs  
FEEL "MORE  
PREPARED"**

to respond to an SMB  
ransomware infection if  
BDR is in place.

## FINAL TAKEAWAYS

**Businesses must prepare the front line of defense: your employees.** Today's companies must provide regular and mandatory cybersecurity training to ensure all employees are able to spot and avoid a potential phishing scam in their inbox, a leading entrance point for ransomware.

**Businesses must leverage multiple solutions to prepare for the worst.** Today's standard security solutions are no match for today's ransomware, which can penetrate organizations in multiple ways. Reducing the risk of infections requires a multilayered approach rather than a single product.

**Businesses must ensure business continuity with BDR.** There is no sure fire way of preventing ransomware. Instead, businesses should focus on how to maintain operations despite a ransomware attack. There is only one way to do this: with a solid, fast and reliable backup and recovery solution.

**Businesses need a dedicated cybersecurity professional to ensure business continuity.** SMBs often rely on a "computer-savvy" staff member to handle their IT support and not an IT expert. If a company cannot afford a complete IT staff for 24/7 cybersecurity monitoring, they should be leveraging a Managed Service Provider (MSP) who has the time and resources to anticipate and protect a company from the latest cybersecurity threats.

## ABOUT DATTO RANSOMWARE DETECTION AND RECOVERY

With Datto Ransomware Detection, available on SIRIS and ALTO devices, MSPs can easily identify a ransomware attack and roll systems back to a point-in-time before the attack hit. Ransomware, like most illicit software, leaves an identifiable footprint as it takes over a server, PC or laptop. Datto's devices, which actively monitor backups, can detect a ransomware footprint and instantly notify admins that they have a ransomware attack on their hands. After that, recovery is simply a matter of restoring from a previous known good backup.

**Datto protects all of your business data, no matter where it lives:**

- **Protect NAS Information:** Traditionally deployed as a cloud-protected network attached storage (NAS) device, the device now includes NAS Guard, which allows customers to protect the device and other network storage with full image rollbacks under one umbrella.
- **Protect SaaS Information:** Subscribers can roll files and data stored in software-as-a-service (SaaS) applications, such as G Suite and Office 365, back to a known good state of health.
- **Protect FSS information:** Building on the ransomware lessons learned from Datto Saas Protection, Datto Drive now performs daily backups in the cloud and on customers' local appliances, protecting both from ransomware.
- **Protect backup data itself:** While backups are happening they exist as a network share that ransomware could encrypt. In the event that does happen, Datto can roll the backup data back to a healthy point and continue on incrementally as if nothing happened.
- **Get back to production quickly:** Whether you have virtual servers or physical servers, Datto reduces your Failback Time Objective (FTO) to the time of a reboot. Restoring back to production with virtual servers is really easy, we leverage your hypervisor environment to handle the cutover. Physical servers have always been a pain but we introduced Fast Failback to reduce your failback time down to a reboot.
- **Restore only the information you need:** Use Backup Insights to compare what changed and restore only what is needed.

## ABOUT THE SURVEY

Datto's Global State of the Channel Ransomware Report is comprised of statistics pulled from a survey of 1,700+ managed services providers in the US, Canada, Australia, the UK and around the world.

To learn more about the report, please reach out to [Katie Thornton](#), Senior Manager of Content Marketing at Datto, Inc.

## ABOUT DATTO

Datto is an innovative provider of comprehensive backup, recovery and business continuity solutions used by thousands of Managed Service Providers worldwide. Datto's 300+ PB purpose-built cloud and family of software and hardware devices provide Total Data Protection everywhere business data lives. Whether your data is on-prem in a physical or virtual server, or in the cloud via SaaS applications, only Datto offers end-to-end recoverability and single-vendor accountability.

Datto's innovative technologies include Instant Virtualization, Screenshot Backup Verification™, Inverse Chain Technology™, Backup Insights™, and end-to-end encryption. All Datto solutions are supported by 24/7/365 in-house technical support and selected products offer time-based cloud data retention, for predictable billing and budget management.

The Datto product line consists of the Datto SIRIS Family, Datto ALTO Family, Datto Backupify Family, Datto DNA Router, and Datto NAS.

Founded in 2007 by Austin McChord, Datto is privately held and profitable. In 2013, General Catalyst Partners invested \$25M in growth capital, and in 2015 McChord was named to the Forbes "30 under 30" ranking of top young entrepreneurs.
